40 pitches
open 1st Mar to 8th Jan

 Tents  Caravans  Motorhomes

ENVIRONMENT / NATURE STATEMENT

Longs Acres Environmental policy.

Carbon Footprint:

Long Acres Touring Park has introduced passive / infrared sensors to the lights within the facility block to reduce energy. The lights are timed and are responsive to daylight levels. All lighting throughout the site uses low energy lamps.

Air Extraction / Ventilation:

The facility block has a heat recovery ventilation system which uses the Shower / Heated stale air to partially heat the fresh incoming air from the outside, the system uses a bidirectional radiator and is rated at 70 % efficiency in transferring heat.

Recycling:

We strongly encourage all our guests to use our Refuse and Recycling area.

All reclaimable materials are sent for recycling.

There are two specific area's containing specifically labelled dustbins to accept the following;-

- **Clear Glass**
- **Green / Brown Glass**
- **Paper, Cans, Plastic bottles & Cardboard**
- **General Rubbish**

Nature & Wildlife:-

The grass is deliberately left long in specific area's and along the perimeter of the site – to encourage wildlife to the site. Bird feeders have been installed through the site, guests are welcome to bring peanuts for the birds.
